

ARIS NEWSLETTER

Welcome to the spring 2018 edition of ARIS news. This issue includes news from the cloud and tells you all you need to know about ARIS 10. As always you'll find lots of useful customer references and we will tell you why you have to block your diary for the International User Groups Conference (IUG), the event of the year, and how to become an ARIS insider based on our webinar series.

Enjoy reading and watch out for our next edition in the summer!

Your ARIS Community Team

In this Issue

- Your data - our promise: The ball is in your court!
- 500,000 members and still growing – even in a new design
- Get proactive insights to make the right decision every time!
- Are you getting the most out of your SAP® solutions?

- Become an ARIS 10 insider with our webinar series
- We <3 our customers - and they love ARIS
- We want you: Check our jobs for global consultants
- Follow us on social media

Your data - our promise: The ball is in your court!

You've probably heard of **GDPR**, the new **General Data Protection Regulation**, which determines how businesses do business. GDPR is a total data-protection game changer: From May 2018 on, companies will need to manage and protect personal data better than ever before.

What does that mean for you? The ARIS Community Team provides you with exclusive news around ARIS that we hope you'd like to hear about. **If you want to receive the next edition of ARIS news, make sure to actively opt-in the checkbox in your ARIS Community profile** - even if you already received ARIS news in the past!

Here is what you have to do to make sure you will still receive ARIS news and other updates in the future:

- go to your ARIS Community profile
- check the box "**Receive ARIS News**"

500,000 members and still growing – even in a new design

After having released our [new design](#) last week, today we have reached another milestone:

We have been waiting impatiently for this special moment to come and are delighted to finally welcome our 500,000th ARIS Community member! So let us all celebrate this historical moment by congratulating our newest member and giving a warm welcome to [Eugen Ackermann!](#)

Amazing, but true: We have launched ARIS Community in May 2009 and have been growing steadily since then to finally become this huge and committed community of ARIS beginners and experts sharing their knowledge and helping each other.

We are very proud of this great achievement and at the same time totally aware of the fact that we owe it all to **YOU!** So this is the right time to say **THANK YOU** for your great support in the past years.

We have **500,000** members.
Thank you for being one of them!

Stay tuned :)

Get proactive insights to make the right decision every time!

Do you wonder how your process models correspond to reality? Are you overlooking a way to make your processes better? Wouldn't it be fantastic to know if processes are executed the way they were modeled or, even better, if not, to see why and how to change it?

Prove the value of your daily work and make better decisions based on powerful visualizations using reliable process mining and data analytics.

ARIS enable you to combine process design with process mining and fully use analysis to provide actual measured Key Performance Indicators (KPIs) side-by-side with documented to-be processes.

This gives you transparency so you can see how the processes are supposed to run and if they meet real-time KPIs so you can make reliable business decisions, day by day. Use the results to simulate and dynamically analyze business processes to identify the best way to improve them.

You can:

- Identify low-running processes with discrepancies or structural faults
- Find delays and the root causes of problems
- Identify gaps, issues and opportunities before implementation
- Improve processes to perform better, cheaper and faster
- Measure performance through simulation before execution

Sounds interesting? Read the [fact sheet](#) or visit us on process-intelligence.com

Hear the latest news from the cloud

ARIS Cloud 10 Service Release (SR) 2 is now available in the public cloud. You can use the new features of ARIS Cloud Advanced immediately after your next log in.

ARIS Cloud 10 SR 2 provides:

- **UI/UX improvements:**
A new tidy Home view welcomes you and you can quickly navigate to your sections of interest
- **Configurable view generation of process models:**
Views can be configured to meet the different needs of use cases
- **Optimized search result order:**
Extended search ordering is optimized for improved search results
- **Remember past search when navigating to search result:**
Past searches are remembered when navigating back to search
- **Ease of use in extended search:** Filters are frozen when scrolling
- **Steps view – new “back to top” button**
- **Auto-follow streams when posting or commenting in collaboration**
- **Semantic check in ARIS Connect for methodical correctness and individual modeling conventions**

You find more information about the new features in the [ARIS 10 SR2 features overview](#).

If you are new to the cloud, go to ariscloud.com and start with [your free trial version of ARIS Cloud Basic](#) immediately.

Risk and compliance goes cloud – will you follow?

The ARIS Governance Risk & Compliance (GRC) Management Platform is available as ARIS GRC Cloud in a private cloud environment.

ARIS GRC Cloud is a full-scale GRC Management-as-a-Service platform. You can choose from four sizes to meet your individual needs and gain immediate access to GRC management. Risk and compliance experts will find new information about the ARIS GRC Cloud offering on ariscloud.com and can download the [ARIS GRC Cloud factsheet](#). If you are interested in a test version, please get in touch with your Software AG sales contact.

Want to know more about risk and compliance management with ARIS 10? Watch our [webinar](#).

Block your diary. Invite your colleagues. Don't miss the event of the year!

Visit Software AG and an audience of your peers for the 2018 **International User Groups Conferences (IUG) in Berlin**. Save April 11-12 for the [International ARIS User Group Meeting](#) in Berlin, Germany. Join this well-established annual conference to meet other like-minded users and ARIS experts to network and hear the latest ARIS news.

IUG is only a few short weeks away. Join us to:

- Hear success stories from global enterprises
- Learn from your peers from different industries
- Share and discuss experiences and evaluate innovative ideas
- Engage directly with Software AG experts

[Registration](#) is open, and you'll find a draft agenda on the [event website](#). For the first time this year, we are introducing **CollaborationHub**, which is your place to meet Software AG product users and dive deep into topics of mutual interest. Participants can share tips and tricks, find working solutions and make professional connections that can be extended in our online community. Learn more and join the [CollaborationHub for ARIS](#).

Can't make it to Berlin? No worries! Software AG hosts and joins various **global and local events around the globe** and also provides online events for your convenience. Please have a look at our [event site](#) and check out our calendar.

- Watch our [2017 product release update](#) on demand
- Check out our new [Digital Business Demos](#) each week for timely webinars on digital transformation

Become an ARIS 10 insider with our webinar series

The ARIS 10 webcast program is a series of live demos around the theme "Manage Your Digital Future". Attend this webcast series to gain new insights into ARIS 10, and to see how ARIS helps you focus on Digital Transformation without compromise.

Each live webcast will include a demo and will focus on different individual ARIS topics. The program will be 30-45 minutes and conclude with Q&A session where participants will have the opportunity to ask questions of our ARIS experts.

Join us for these programs:

- [Why Now is the Time - Moving From ARIS Publisher to ARIS Connect in 2018](#) on March 27
- [Control the Way You Run Your Business – Integrated Process Mining with ARIS](#) on April 5
- [Excellence at Work With Your Digital Twin](#) on April 26
- [Manage your Migration to SAP S/4 HANA with a Process-Driven Solution](#) on May 3
- [Scenario Planning – Choose the Right Business Setting](#) on July 3
- [Managing Process Landscapes](#) on September 6

If you are interested but you cannot make it at that time, don't stress: Each registrant will receive the recording of the webinar afterwards.

Are you missing something? Please feel free to submit your topic suggestions to marketing@ariscommunity.com

We <3 our customers - and they love ARIS

Different industries, different challenges, different goals! There are so many ways to benefit from ARIS!

Get through the highlights of the newest ARIS projects:

- Telefonica is THE reference project for Telco 3.0 in Spain. ARIS supported the complete business transformation and redesign of end-to-end processes and, among other benefits, helped reduce the processing time of offers by 60 percent and significantly reduce the incidence rate. [Watch and listen to Enrico Ascaso, the director of the Telco 3.0 project](#)
- The University Relations project paves the way for building talent for the next generation. [Watch Yvonne Antonucci telling how ARIS performed in this project](#)
- KKB is the first bureau of a new domestic industry in Turkey and needs to support its record-breaking pace of growth. Digitalized information and immediate access to information are just some examples what was made possible by ARIS. [Read more](#)

- Learn how ARIS has helped Yara International, a Norwegian chemical company, on its digitalization journey [here](#)
- The digitalization journey of Orkla, a consumer goods company, is about aligning processes with systems and complying with GDPR. [Listen to Lars Bratthall statements](#)
- **Kuehne+Nagel** aligns business with IT using ARIS. [Frank Strömer reports.](#)
